Bei großen Durchmessern können die biegbaren Treppenkantenprofile auch "von Hand" gebogen werden. Ansonsten besteht die Möglichkeit eine modifizierte Küberit-Biegemaschine gegen eine Leihgebühr zu erhalten oder die Profile bei Küberit biegen zu lassen. Bitte sprechen Sie das Küberit-Verkaufsteam an.

The stair nosing profiles can be bended by hand in case of large diameters, otherwise it is possible with the improved bending machine or Küberit can bend the profile on demand. Please ask the Küberit sales team.

Die Treppenkantenprofile sind in den 6 bekannten Küberit-Metallfarben und in den Längen 5,0 m und 2,5 m erhältlich.

The stair nosing profiles are available in the 6 usual aluminium metal finishes and in lengths of 5.0 m and 2.5 m.
